

# Software Developer

The world of online betting is fast-paced, with promotional offers coming up and expiring almost daily. Our bet calculator - available online, via iOS, Android and Amazon - needs to remain up-to-date with all the latest features required for calculating all betting outcomes - no matter the market. In addition, our website needs to be super easy for customers to use and so we're looking for a Software Developer to join our team on a full-time permanent basis to help keep us ahead of the competition.

Main duties include:

- Build and implement functional programs
- End to end management of the software development life cycle
- Design algorithms and flowcharts to produce clean, efficient code
- Troubleshoot, and improve existing software
- Be proficient in Java

The successful candidate:

- Proven experience as a Software Developer
- Experience with software design and development
- Knowledge of coding languages, including Java and Javascript
- BSc/BA in Computer Science, Engineering or a related field
